SUMMARY

Full-stack engineer with 3+ years of experience designing scalable backend systems and integrating enterprise-grade third-party platforms. Specialized in API architecture, real-time application design, and cloud-based deployments. Experienced in cross-functional remote collaboration and end-to-end ownership of production systems.

WORK EXPERIENCE

Software Developer

Feb 2023 - Present

WLC Technology

- Designed and maintained scalable REST APIs powering enterprise workflow automation.
- Integrated third-party services (SharePoint, OneDrive, DocuSign, Jira, AdobeSign).
- Implemented real-time systems using SSE to enable live event updates.
- Led development of a live auction platform with low-latency bidding.
- Collaborated with frontend, QA, and business teams in production releases.
- Experienced working in collaborative, distributed team environments.

EDUCATION

Full Stack Web Development

Jan 2022 - Jan 2023

Masai School

- Intensive 1-year program focused on MERN stack development, covering frontend & backend, REST APIs, and data structures & algorithms.

PGDCA

Jun 2021 - Jul 2022

Dr. C.V. Raman University, Bilaspur

- One year postgraduate program covering core computer science fundamentals, programming, databases, operating systems, and application development.

Graduation (BA)

Jul 2017 - Apr 2020

Bastar University, Jagdalpur

- Bachelor of Arts with core studies in Sociology, Economics, and Communication skills.

KEY SKILLS

- API Design
- System Integration
- Real-time Architecture
- Authentication & Authorization
- Cloud Deployment (AWS)
- Database Optimization
- Performance Tuning

PROJECTS

Streamline AI

- Maintained and enhanced enterprise workflow automation systems, implementing secure OAuth integrations and real-time data synchronization.

Trackify AI

- Architected and built a full time-tracking and project management system from scratch.

Emerson.com & ProTeam

- Emerson (Salesforce) – Developed enterprise Salesforce applications using Lightning Web Components (LWC); built reusable components in a collaborative team setup.

Auction Management

- Designed real-time bidding architecture using SSE for low-latency updates.
- Implemented event-room architecture supporting concurrent bidding sessions.
